Summary

- I'm a Computer Science & Engineering student interested in acquiring real-world industry experience. I have developed a scope of understanding and drive for web development through personal fullstack projects and university course tutorial assistance. I'm eager in leveraging my comprehension to help in reaching company goals as well as progressing further in my software engineering career.

Experience

Oct 2021 - Jan 2022

Web Application Development Course Assistant

International University of Sarajevo (IUS), Ilidža, Bosnia and Herzegovina

- Participated in simplifying course topics through creating informative and in-depth video explanations
- Gained notable feedback from numerous university faculty members
- Realized the significance of continously improving weakpoints and gaps in one's own knowledge

May 2019 - Oct 2020

Administrative Office Worker

Pekara "Nafaka", Doboj-Jug, Bosnia and Herzegovina

- Obtained a glimpse into object-oriented programming through utilizing the old-school language Visual FoxPro
- Received valuable programming insights learning from a well-informed colleague having 10+ years of IT experience
- Grasped the importance of debugging through handling continous inventory program updates and errors

Projects

Feb 2021 - May 2021

Supermarket Food Expiration Alert Application

https://github.com/blackhat126/supermarket-food-alert-app

- Built an EJS/Node.js fullstack application for alerting supermarket employees about individual food item expirations
- Implemented the ability for adding new food items based on name, brand, and customizable in-store location
- Created a hierarchical employee login system restricting certain levels of access to application features

Education

Oct 2018 - present

Bachelor of Computer Science & Engineering

International University of Sarajevo (IUS), Ilidža, Bosnia and Herzegovina

- Coursework:
  - Web Application Development
  - Human Computer Interaction
  - Database Management
  - Algorithms and Data Structures
  - Network Programming
  - Principles of Quantum Computing

Hard Skills

React

Node.js

MongoDB

MySQL

Git

Soft Skills

Critical Thinking

Active Listening

Teamwork

Adaptability

Persistence
